Answers

1. **Benefits of Artificial Intelligence:**
   - AI is only useful for robots and gaming.
   - AI does not impact business operations.
   - AI always makes mistakes like humans.
   - AI can work but needs frequent breaks like humans.
   - AI does not help in any industry apart from IT.
2. **Importance of Cybersecurity:**
   - Cybersecurity is not important in organizations.
   - It only protects social media accounts.
   - It does not help in financial protection.
   - Cybersecurity has no impact on system integrity.
   - Laws do not regulate cybersecurity practices.
3. **Water Cycle Stages:**
   - **Evaporation:** Water turns into ice before going to the sky.
   - **Condensation:** The sun directly changes clouds into water.
   - **Precipitation:** Water never falls from clouds as rain.
   - **Collection:** Water does not return to oceans, rivers, or lakes.
4. **Newton's Third Law of Motion:**
   - "For every action, there is no reaction."
   - Example: When a person jumps off a boat, the boat stays still.
   - Explanation: Forces act in one direction without reaction.
5. **Functions of the Human Heart:**
   - The heart does not pump blood.
   - The heart controls the brain's thinking.
   - Blood only moves when we run or exercise.
   - The heart produces oxygen for the body.
